Simple Operations Fitted Together

The business of Swift & Company is the fitung together of many simple operations.

No one thing in a packing business is particularly duricult for men trained to do it; but no one thing is enough.

Thousands of other operations, properly performed, are necessary for the completed processes. And someone must fit together all these thousands of simple operations.

The success with which a packing business performs its function of supplying the best possible meat products. to the consumer with the greatest possible benefit to both him and the producer depends upon the energy. brains, experience, and faithful effort of the men trained in the business.

Swift & Company turns the producer's live stock into meat for the consumer at a profit of only a fraction of a cent a pound because it fits these operations together with the least waste, overlapping, and fraction.

Do you believe government direction could do berter?
